PART ONE

Introduction

Information management represents a combination of:

1. Information systems used for handling data, information and knowledge e.g. library, precedents, case management, case files etc.
2. Information and Communication Technology (I.C.T.) by which is meant the tools which support our information systems represented by the variety of hardware and software (both generalist and specialist) which is available to us and the Barristers
3. Chambers systems, by which is meant operational processes and procedures for the conduct of our Chambers and which require the support of I.T while inevitably resulting in the development of Information Security (IS).
4. Information assets - being that information, data and knowledge that Chambers collects in the course of its activities, be it about staff, Barristers, its clients or other third parties with whom Chambers deals.

Our Information Management Policy and Procedures outline our approach to the identification, monitoring, and safeguarding of the above.

PART TWO

Chambers' Approach to Information Management

The person with overall responsibility for the Information Management Policy is **Glen Hodgetts**. This responsibility includes conducting an annual review of the policy to ensure its effectiveness.

As a sole practitioner, Glen Hodgetts has introduced information management systems and information technology to meet the needs of his practice and in particular, with safely securing the data of his clients.

An Information Plan is prepared as part of the annual Chambers planning process and reviewed on a 12 monthly basis. This will consider the development of information systems & I.C.T. to support not only our current operations but Chambers' strategies and plans.

Glen Hodgetts is currently a sole practitioner without any staff or employees but if at a future point, new members of chambers join his chambers, Members of Chambers, pupils and staff should recognise their individual and joint responsibility to follow relevant practices and procedures in order to maintain day-to-day excellence in managing the information entrusted to Chambers by clients and barristers, and to maintain our own information management systems.

The Purpose

The purpose of our policy is to prevent mismanagement of our information systems, assets and I.C.T. wherever possible in order to avoid or at least mitigate the following (the list is not exhaustive):

- proceedings under the General Data Protection Regulation
- the inability to provide services
- reputational and/or financial damage
- negligence claims
- breaches of confidentiality
- breaches of the BSB regulations

Register of Information Assets

Chambers carries out an audit of the principal information assets it holds on an annual basis. This information is contained in the **Information Asset Register** contained at the annexe hereto and includes the main categories of information we hold in relation to our clients and Chambers itself along with the security measures taken to protect them.

In general terms the types of document to be held in the systems are:

- Chambers' documents (leases, business plans, policies and procedures etc.)
- Client documents (documents relating to clients)
- Fee and diary documents
- Staff documents (contracts, payroll information etc.) - not currently applicable
- Reference materials (statutory and case law materials, library materials, Westlaw website internet membership, Freemovement website membership, ILPA website membership)
- Other pupillage, mini-pupillage and lateral recruitment documents (as required) - not currently applicable but potentially so at a future date

The Information Asset Register also includes the arrangements for the **safe disposal of assets** once they are no longer required by Chambers or barristers.

Protection and security of information assets

Glen Hodgetts, and if at a future date other members of chambers join him, every barrister, member of staff (if in future employed) and pupil (or future pupil) is responsible for the protection and security of information assets entrusted to them.

Staff should at all times do their best to ensure the accuracy, relevance and sufficiency of any information in accordance with the processes and procedures relevant to their role and they will, at all times, seek to maintain the confidentiality and security of the Chambers' information assets.

The protection and security of assets is covered by sections later in this document but also considered in the Chambers' Continuity Plan.

Training & Awareness

Glen Hodgetts has undertaken training by assistance provided by the Bar Council and in particular, by study of resources and GDPR Toolkits provided to him by Tom Marsland of **Riliance Risk Management Software and Training** on 21st May 2018 together with personal legal research.

New staff joining the Chambers will be introduced to the information management policy as part of their induction programme.

Staff moving between roles within Chambers will receive training in the information management processes and procedures **relevant to their new role**.

All staff will be alerted to changes in the information management policy and to changes to any processes and procedures relevant to their current role. If necessary they will receive further training or guidance in new processes and procedures.

Specific Areas of Information Management for Chambers' Employees

I.C.T. System Security

Chambers is increasingly reliant on information and communication technology (I.C.T.) for the preparation and delivery of its services to barristers and clients - solicitors and lay client through public access work. This increases the significance of effective computer management systems within Chambers. There are also important rules and procedures in relation to e-mail protocols and the use of the internet.

Chambers keeps under review its I.C.T. systems and as new technology is developed new policies and procedures may be introduced. Glen Hodgetts as Head of Chambers and sole practitioner is solely responsible for the management of the I.C.T. system and also to review I.C.T. requirements on an ongoing basis in the light of the business plan and to make purchases whenever appropriate.

System Risk Management

System management is the responsibility of Glen Hodgetts.

Chambers has identified the following critical risks to our system:

- Fire
- Computer virus attack
- Theft
- Incompetence
- Malice
- Email Hacking
-

Chambers has in place the following processes, procedures and technology to eliminate, minimise or transfer the critical risks identified above:

- Virus protection system - by Virus Barrier Express
- Management of system configurations - password protection and encryption via FireVault of entire computer requiring additional password authentication after initial entry of the OS
- Regular system backups - every hour to two encrypted servers - one based in the same room as the main computer, another in a separate location and hidden
- Management of OS updates - regular updates automatically of security and firmware
- Use of a router firewall on its internet connection
- User passwords procedures - see above
- Management of user accounts including restrictions of access and removal of users where access is no longer required
- Continual training on I.C.T. systems
- Restrictions on computer systems to prevent data being added or removed - only Glen Hodgetts has access to Chambers one and only computer
- Physical security of Glen Hodgetts Home address in which Chambers computer and all files are stored - including appropriate locks on private office within the building
- Chambers' Continuity Planning
-

System Security

Chambers ensures the appropriate management and safe storage of electronic documents by restricting the access permissions to certain electronic folders as and when appropriate. All client data is additionally encrypted result in 3 factor authentication (i. opening computer, ii. FireVault on whole of computer requiring password iii. Client data additionally encrypted requiring further password)

[Permissions are set on each individual document as appropriate to safeguard the integrity of each document.]

Passwords & Confidentiality

Where passwords are used, Glen Hodgetts and if at any future point staff of others join chambers, all parties:

- must choose and memorise a unique password - do not write it down or save it electronically anywhere. Do not use a password you use anywhere else.
- must not disclose the password to anyone else
- must not ask for another person's password
- must change the password immediately if anybody else becomes aware of it
- follow any internal instructions with regard to the changing and safeguarding of passwords
- use at least two factor authentication on any use of cloud data**
- all sensitive client data stored in a cloud will be located in the UK/EU (ie not outside the EU), and will be stored in a** secure portal that operates with click-and-PIN access, TLS connections, AES-256 encryption and multi-factor authentication for your data's protection. See Data Management Policy for further details.
- Glen Hodgetts operates a secure encrypted email portal based in the EU which is 'GDPR compliant', through which all or all sensitive information can be transferred to and from Glen Hodgetts. Glen Hodgetts can be emailed at glen.hodgetts@equalitylaw.co.uk or securely at glen.hodgetts@equalitylaw.secure-comm.com in order to set up a client secure and individual communication stream. Client's will be given a direct link their personal secure stream and will be able to access it after creating their own confidential 4 digit pin within Chambers secure portal. The portal will send clients a user name and password. Once set up, secure communication can be made by clicking on the "reply

securely" button in Chambers' email to the client, or via Chambers' online secure portal at:-

<https://equalitylaw.secure-comm.com>

Glen Hodgetts' secure portal operates with click-and-PIN access, TLS connections, AES-256 encryption and multi-factor authentication for your data's protection. If client's do not wish to use the secure email portal but to use standard insecure email, they are informed of the risks of so doing and will be asked to explicitly consent to continued used of insecure standard email.

Choice of passwords

You should take care to select a secure password. Passwords used to access computers or encrypted data should be sufficiently memorable that you can avoid writing them down, but not obvious or easily guessed. Long passwords are best, as a short password can be cracked more easily by hacking software. A combination of three words, using a mixture of upper case and lower case characters and at least one numeral may be easiest to remember. Default passwords (e.g. '1234', 'admin') should always be changed. It is sensible not to use the same password for all devices, services and websites and to change your password from time to time and in any event if it is disclosed to another person or discovered. You should be aware that some websites store passwords in readable text.

Access using biometric technologies such as a fingerprint scanner or facial recognition software are acceptable alternatives.

Other Issues

If I anticipate that someone may need access to your confidential files in my absence I will arrange for the files to be securely copied to your secure portal stream so that you will have access to them and be able to provide them to whoever needs to have access to them.

If I am away from my computer I will lock the screen to protect against unauthorised access. My computer has a default period set to lock the screen requiring password access after 1 minute of going to screen saver or after 10 minutes of not being used.

I may have access to data on computers, whether at my office or at home or elsewhere on a mobile or laptop, and I will take adequate precautions to ensure confidentiality so that neither Chambers nor individuals are liable to prosecution as a result of loss or disclosure which might cause distress or hardship to present, former or potential employees, barristers or clients. Data will not be left in a position where it might be read inadvertently by another person entering the room. Data will not be read or worked on in public where it can be overlooked by members of the public. In respect of pupils or work experience trainee lawyers, you may only access those parts of our computer system which you need in order to carry out your duties.

Downloading Data and Software

Chambers' (future) employees will NOT have access to the Chambers' systems and data or the computer of Glen Hodgetts. However, if at a future date Glen Hodgetts employs any staff who need to have access to Chambers computer, such staff will safeguard the systems in accordance with this policy and will adhere to the Chambers' policy on Downloading Data and Software:

To ensure that no malicious content can be loaded onto our system, neither Glen Hodgetts or future Chambers' employees will load any data from any kind of storage device on to the Chambers system without first obtaining the consent of Glen Hodgetts.

Examples of data storage devices are:

- Portable external hard drives
- Media player hard drives
- USB memory sticks
- DVD-RW drives
- CD and DVD disks
- Memory cards from cameras

Data storage devices which are to be copied on to the system must be formatted before use and any transfer of data to any such device must be authorised by Glen Hodgetts.

No electronic data, however stored, should be taken off site (Glen Hodgetts registered office or home) by anyone without the authority of Glen Hodgetts or by pupils carrying out work for Glen Hodgetts without the authority of any future barrister and member of chambers.

If such authority is given and confidential data of any sort is removed from Chambers, it should be held securely and returned to Chambers as soon as possible and immediately erased from the data storage device to which it has been temporarily saved.

No software may be loaded onto computers without the express permission of Glen Hodgetts. Software includes applications, entertainment software, games, screen savers and demonstration software.

Disks from unknown sources or from home must not be used on the system without permission and without prior checking for viruses.

Saving Documents

All documents should be saved to the appropriate folder and not to local drives or the 'my documents' folder. Documents from public access clients must be saved to the folder for that particular client contained within the public access main folder. This folder is encrypted.

Documents sent by solicitors will be saved under Chambers main folder for the receipt of such work and stored by the month on which papers first came into chambers and in the sub folder for that particular lay client.

Use of Personal I.C.T. equipment in Chambers

Unless specifically authorised by Glen Hodgetts personal I.C.T. equipment used by Chambers' employees must not be connected to the I.C.T. systems for any reason and to do so may be a disciplinary offence. Examples of personal I.C.T. equipment include:

- laptops
- gaming devices
- iPhones
- iPods
- digital cameras
- GPS systems
- MP3 players
- mobile telephones/smart phones

- handheld/palmheld computer or personal digital assistant (PDA)

Laptops and mobile devices (including storage devices)

Glen Hodgetts operates a mobile phone which has access to client data whilst in court and when otherwise mobile and away from Chambers computer.

Glen Hodgetts **mobile phone** will be protected by:-

- i) fingerprint access of Glen Hodgetts only;
- ii) additional 6 digit code to open the phone;
- iii) phone locks to lock screen in 30 seconds requiring pin or fingerprint;
- iv) mobile data access to the secure portal has additional 4 pin password protection after phone lock screen is open and all data stored thereon is encrypted with AES-256 encryption;
- v) all use of mobile email/data access function is reported electronically to Glen Hodgetts desktop in case of suspected unauthorised use;
- vi) in case of theft, all data can be remotely deleted;
- vii) in case of theft the mobile phone can be traced via GPS

Care must be taken when taking outside Chambers laptop computers and mobile devices which are used for work. Laptops and mobile storage devices must be encrypted and must never be left unattended. In particular, they must not be left unattended in cars, whether the cars are locked or not. When travelling, these should, where practicable, be kept out of sight and stored as inconspicuously as possible. Any loss of a desktop, laptop, tablet, tablet, smartphone, or portable storage device must immediately be reported to Glen Hodgetts and thereafter to the police if applicable and reported to the ICO as soon as possible and in any event within 72 hours of coming to learn of the loss.

Accessing the System from Outside Chambers

Glen Hodgetts Email and data storage has the capability for Glen Hodgetts (and any future staff, future barristers or pupils) to access the system from home, using laptops or other external computer equipment. The principles, policies and procedures that apply to use within

Chambers apply to such situations and all barristers, pupils and staff involved must be conscious of this in their work. Access to chambers data outside of the home of Glen Hodgetts will only be undertaken by using the secure data portal of Glen Hodgetts.

Glen Hdogetts/Chambers computer has a firewall and security systems in place it is expected that anyone working on external I.C.T. must ensure that their personal equipment also has anti-virus and firewall facilities installed to prevent security risks from external access. Care should be taken when using public Wi-Fi facilities in public places (for example, coffee shops, airports, trains) as such public systems enable data easily to be accessed by unauthorised third parties. Accordingly, consideration should be given as to the use of such public Wi-Fi facilities and the risk to data as a result. It is more sensible to avoid using public Wi-Fi and to use a password protected secure mobile broadband devices.

General

All active applications should be closed before logging out.

All systems should be shut down and switched off before leaving [(as should printers by the last person to leave an area)]. (Future) Staff must ensure that their machine has correctly shut down before leaving.

You are not allowed to make any changes to the configuration or connections of the Chambers' IT system with authorisation from Glen Hodgetts.

Data Protection

Chambers is required to comply with legislative and regulatory provisions governing the management and storage of personal information, most notably the General Data Protection Regulation (GDPR). It is the responsibility of Glen Hodgetts to ensure that:

- all Chambers' (future) staff are aware of their obligations under data protection law and are provided with any update as to how they are required to support Chambers in ensuring compliance; and
- Chambers is able to demonstrate its compliance with the principles relating to processing of personal data (set out in Article 5 of the GDPR).

The General Data Protection Regulation (GDPR)

The GDPR establishes a framework of rights and duties which are designed to safeguard personal data. This Chambers may, if it eventually employs staff, retain personal data about its employees and may hold data relating to barristers' cases (if future barristers are to join chambers).

The framework under the GDPR balances the legitimate needs of organisations to collect and use personal data for Chambers and other purposes, with the right of individuals to respect for the privacy of their personal details.

Personal Data

Protection of personal data and respect for individual privacy are recognised as fundamental considerations in the day to day operations of Chambers. Chambers must comply with the GDPR. 'Personal data' means data which relates to a living individual who can be identified either:

- from the data, or
- from the data and other information which is in our possession, or is likely to come into our possession, and includes any expression of opinion about the individual and any indication of our intentions or those of any other person in respect of the individual

Meaning of "Processing"

"Processing" includes obtaining, recording, holding or disclosing information or data and carrying out operations on the information or data.

All data covered by GDPR (which includes not only computer data but also personal data held within a filing system) must be:

- processed lawfully, fairly and in a transparent manner;
- processed for limited purposes
- adequate, relevant and not excessive
- accurate
- not kept longer than necessary
- secure

Chambers is responsible for and must be able to demonstrate compliance with, the principles listed above.

In relation to these principles:

Greater protection is required for “sensitive personal data” including information held as to a person’s physical or mental health, the commission of any offence and any proceedings relating to such an offence (including the outcome or sentence in such proceedings), the person’s political opinions, religious or similar beliefs, sexual orientation, membership of a trade union or genetic or biometric data.

Chambers will consider:

- whether anyone has been misled in how the data has been obtained
- whether the person from whom the information was obtained has been deceived or misled as to the purpose or purposes for which the data will be processed
- whether we have informed the data subjects of our identity, the purpose or purposes for which the data are intended to be processed and anything else which we think is necessary in order to make the processing fair

We will take reasonable steps to ensure the accuracy of the data - 'reasonable' depends on the purpose of the processing.

Personal data processed for any purpose or purposes will not be kept for longer than is necessary and for that purpose data retention, review and deletion schedules are set up and implemented.

The GDPR gives data subjects a number of rights, the foremost of which is the right to have access to their personal data where permitted under the GDPR.

Data subject rights also include prevention of processing for direct marketing purposes and these rights will be considered in any marketing activities we may undertake.

We have a duty to take appropriate technical and organisational measures against unauthorised or unlawful processing of personal data or accidental loss or destruction of, or damage to, personal data. Our Information Asset Register and Risk Register takes this fact into account and appropriate policies and procedures will be maintained to protect against damage, loss or destruction of data.

We will also take steps to ensure the reliability of any employees who have access to personal data.

Data Protection and (future) Staff Members

Chambers may eventually hold information relating to (future) employees, pupils, mini-pupils and barristers and is a Data Controller for that data under GDPR. Chambers may process both manually and by electronic means personal and sensitive personal data for the purposes of the administration and management of Chambers' (future) staff's employment. There may be circumstances also where Glen Hodgetts or future individual barristers may hold such information.

Chambers may transfer part of the information held on employees to third parties where required to do so by law, including but not limited to HMRC.

Chambers may also transfer information to third parties where it forms part of the administration of the employer/employee or membership relationship. Chambers may transfer employee information to companies and organisations that carry out processing operations as Data Processors, such as payroll companies and brokers. Chambers will only do this if the arrangement:

- is made or evidenced in writing
- the data processor will act only on instruction from us; and
- the data processor agrees to comply with obligations equivalent to those imposed on Chambers by the GDPR.

Any individual whose data is held may make a "subject access request", i.e. a request to see what data is actually held about them. All such requests should be made in writing to Glen Hodgetts at glen.hodgetts@equalitylaw.co.uk who will arrange to comply promptly with the request and in any event within 30 days.

Confidentiality

The GDPR deals specifically with the processing of data whether in paper or electronic format. However there is a natural overlap with the subject of confidentiality which is covered in other policies and with which all personnel have a responsibility to familiarise themselves.

E-Mails

Electronic mail (e-mail) is core to the operation of Chambers. However, improper use has the potential to cause loss for which Chambers can be held liable including risk of non-compliance with various statutory requirements and threats to the security of the IT system.

Guidelines relating to E-Mails

- Do not send messages from another person's computer or under a name other than your own name. Glen Hodgetts will use only the following email addresses
- Glen.hodgetts@equalitylaw.co.uk, the secure portal email address:
glen.hodgetts@equalitylaw.secure-comm.com
Or glen.hodgetts@me.com
- Do not create e-mail congestion by sending trivial messages or unnecessarily copying e-mails to those who do not have a real need to have them.
- Only forward data and information as necessary for the performance of your duties.

Secure Email :

Glen Hodgetts operates a secure encrypted email portal based in the EU which is 'GDPR compliant', through which all or all sensitive information can be transferred to and from Glen Hodgetts. Please email Glen Hodgetts at glen.hodgetts@equalitylaw.co.uk or securely at glen.hodgetts@equalitylaw.secure-comm.com in order to set up your secure and individual communication stream. You will be given a direct link to your personal stream and will be able to access it after creating your own confidential 4 digit pin. The portal will send you a user name and password. Once set up, secure communication can be made by clicking on the "reply securely" button in my email to you, or via my online secure portal at:-

<https://equalitylaw.secure-comm.com>

Glen Hodgetts' secure portal operates with click-and-PIN access, TLS connections, AES-256 encryption and multi-factor authentication for your data's protection. If you do not wish to use this secure form of email then you must consent not to do so in writing; please let Glen Hodgetts know if writing that you do not wish to use his secure portal.

Appropriate Language

Care should be taken when using e-mail to use the same standards of format, content and style as would be used in a printed format. Although a different form of communication, the approach must be the same. Improper statements can give rise to personal or commercial liability. Work on the assumption that e-mail may be read by others and do not include anything in your e-mails which could cause offence or embarrass the reader or cause embarrassment to Chambers if it were to find its way into the public domain. This includes, specifically, abusive, obscene, sexist, racist, harassing or defamatory messages. If you receive such a message do not forward it on to anyone else but report it to Glen Hodgetts.

Please remember that e-mail messages from Chambers have the same legal effect as a letter on ordinary note paper. Therefore always exercise the same caution in what you say in e-mails as you would in more formal correspondence.

Addresses

Lists of previously used e-mail addresses should be kept up to date.

In the same way that Chambers exercises discretion about giving out the telephone numbers of staff members, care should be taken in giving out e-mail addresses to avoid unwanted correspondence.

Copyright

Sending copyright work by e-mail which has been copied without the consent of the rights-owner may constitute copyright infringement and should not be done.

E-mail makes it very easy to attach materials and to cut and paste materials from other e-mail. Doing so may infringe copyright. Consideration should always be given as to whether an infringement will occur and, if so, the material should not be used.

Incoming messages

All incoming messages for Glen Hodgetts or any future barrister member of Chambers must be forwarded to that barrister to which it is addressed. Each individual barrister must use their own individual email address and email stream on chambers portal and communicate this to their individual clients.

Any suspicious or offensive messages received are immediately to be referred to Glen Hodgetts.

Outgoing messages

Outgoing messages of substance must first be approved by Glen Hodgetts before being transmitted.

You should take care when using the 'auto complete' function that is offered by some email systems to ensure that you do not accidentally select the incorrect email address. In most cases this can be avoided by using the Chambers of Glen Hodgetts secure portal <https://equalitylaw.secure-comm.com> and choosing the correct client stream within the portal.

Caution is advised when using the carbon copy (cc) function and blind carbon copy (bcc) function to ensure that you are not sending data to the incorrect recipient. Again, this can be avoided by using the group function in the Chambers of Glen Hodgetts secure portal: <https://equalitylaw.secure-comm.com>

Consideration should be given to using password protected documents or encryption when sending e-mails containing highly confidential or sensitive data. Encryption is required when requested by the client. The Chambers of Glen Hodgetts secure email portal, which is encrypted, should be used at all times unless the client and data subject specifically requests that standard email be used. Through the Portal, each individual client will be able to assign their own 4 digit code known only to them, and will also be a unique username and password. Data files of any size which are encrypted in the Vault of the Secure Portal should be used rather than any other cloud system.

If on occasion using another cloud storage system (if for example there was an outage of <https://equalitylaw.secure-comm.com>), never send the password required to decrypt an attachment in the same e-mail as the attachment since this would self-evidently defeat the purpose of encryption to avoid interception.

Under no circumstances should e-mail be used to send, receive, browse, download, or store material which may be illegal, offensive or cause embarrassment to others. This includes (without limitation) the use of the office systems to send, receive, obtain, access, download or

store pornographic material, material which is racially or sexually offensive or material which could be deemed sexist, blasphemous, defamatory or abusive.

Deletion of emails

It is the responsibility of Glen Hodgetts and any future member of chambers, barrister or staff, to review regularly all stored messages and delete those that are no longer required in line with the Chambers data retention policy.

Out of Office Message

If Glen Hodgetts or a future member of staff/barrister is away from his/her desk for half a day or more, the auto-office message should be set. Glen Hodgetts will at all times check for any emails whilst he is away notwithstanding his absence from the office.

Email Security

Emails can bring viruses and malicious software into the Chambers' systems. As well as causing damage to those systems and interfering with service to clients and barristers, these viruses have the potential to cause the distribution of confidential information or allow unauthorised access to it. To avoid this type of incident, staff should be especially wary of opening e-mails from completely unknown, unrecognised or unexpected sources. "Phishing" emails can be fabricated to appear to have been sent by a colleague or acquaintance, so be wary of any link or attachment in an email which you were not expecting, even an email from an apparently known and trusted sender. It is not always the e-mail message itself which is the carrier of a virus but the attachment that comes with it or a link contained in the e-mail. If at all suspicious, staff should not open an attachment and should seek advice. If in doubt, delete without opening.

Unsolicited Bulk E-Mail (Spam Mail)

Spam mail can be a significant problem, overloading Chambers' systems and generally being a nuisance as well as being potentially offensive, depending on the content. Most systems provide scope for filtering software to prevent unsolicited mail but the danger is that if fully utilised it may block legitimate mail as well. All Chambers' staff are responsible for reporting Spam and unsubscribing from spam mailing lists and making spam email into junk.

Personal Use

The minimal personal use by pupils and staff of the Chambers' facilities and of their own I.C.T. such as mobile phones, iPads etc. is acceptable for e-mailing using a personal e-mail account provided:

- the use is minimal and mainly out of normal working hours for example, during lunch breaks or outside core hours of work.
- the usage does not interfere with Chambers' commitments
- the usage complies with other related policies,
- personal e-mails do not contain the Chambers footer.
- In all cases, emails involving client cases as data subjects must be sent through Chambers secure portal using the ipad or iphone secure multi-factor authentication app, Secure Portal App by Stay Private Ltd using chambers portal <https://equalitylaw.secure-comm.com> Under no circumstances should any member of chambers, (future staff) communicate on a mobile device with a client (solicitor or public access client), using email which is unencrypted through a personal account, if such emails contain sensitive data as defined by the GDPR. In any event, even if sensitive data is not conveyed, the secure portal must be used to convey client data unless the client gives explicit consent to so doing.

Continued use of our facilities for all (future) staff is based on the understanding that this use is not abused or overused. Such abuse or overuse could be deemed an individual disciplinary matter.

User Privacy Relating to E-Mail Use

On occasions, if staff are employed in the future, it may be necessary for Chambers to monitor correspondence and communications of employees to ensure the effective operation of I.C.T. systems and to ensure that professional standards are maintained. There might therefore be occasions when it is necessary to check e-mail communications to or from a member of staff.

We trust (future) employees not to misuse these facilities. However, because (future) employees can use e-mail for personal reasons, it may be impractical to conduct monitoring, as described above, which does not in some way impinge on the privacy of employees. Chambers for its part undertakes not to intrude to an unnecessary extent into private e-mails or

to use/repeat/circulate any information which may come to its knowledge by way of the monitoring. However it is generally not advisable to send, receive or forward private e-mails at work which you would not want a third party to read.

Fax security

Glen Hodgetts operates the fax number: +44(0)117 315 0456 . Fax is an inherently insecure system. Glen Hodgetts uses his fax number to receive data from organisations such as the Home Office or Court where those organisations continue to insist on serving data in this manner. Thankfully this is now reducing to the minimum. Glen Hodgetts will not use FAX to convey data unless there is no other way to convey the data to its intended recipient and time is of the essence. For example, in order to communicate an order injunctioning the Home Office from removing a person from the UK via airplane.

If any (future)member of staff of barrister considers using fax, they should be aware of the Information Commissioner's guidelines, which are as follows:

- Consider whether sending the information by a means other than fax is more appropriate, such as using a courier service or secure email. Make sure you only send the information that is required. For example, if a solicitor asks you to forward a statement, send only the statement specifically asked for, not all statements available on the file.
- Make sure you double check the fax number you are using. It is best to dial from a directory of previously verified numbers. Lists of previously used fax numbers should be kept up to date.
- Check that you are sending a fax to a recipient with adequate security measures in place. For example, your fax should not be left uncollected in an open plan office.
- If the fax is sensitive, ask the recipient to confirm that someone is at the fax machine and ready to receive the document, and that there is sufficient paper in the machine.
- Ring up or email to make sure the whole document has been received safely.
- Use a cover sheet. This will let anyone know who the information is for and whether it is confidential or sensitive, without them having to look at the contents.

Internet

Guidelines for Internet Use

Under no circumstances should internet facilities be used to send, receive, browse, download, or store material which may be illegal, offensive or cause embarrassment to others. This includes (without limitation) the use of Chambers' systems to send, receive, obtain, access, download or store pornographic material, material which is racially or sexually offensive or material which could be deemed sexist, blasphemous, defamatory or abusive.

Cutting, duplicating or copying materials from the internet may infringe copyright. Consideration should always be given as to whether an infringement will occur and if so, the material should not be used.

You should take care not to download material or access internet services that could pose a threat to the security of our systems.

You should not enter into a contract or purchase goods and services on behalf of Chambers on the Internet without express authority to do so.

Cloud computing facilities may only be used if they have been made available by Chambers for use by members of staff and pupils, or where a barrister has specifically authorised this in relation to one of their cases. In all cases concerning the transfer or sensitive data, only the secure portal of Chambers should be used as it is encrypted and has multi-factor authentication to make sure that it is sent and can be read only by the intended recipient:--

<https://equalitylaw.secure-comm.com>

The Chambers' internet should not be used for internet membership schemes or chat rooms.

Chambers' Staff Responsibilities (no staff currently employed but this will apply to any future staff)

Employees have a duty to report the following to Glen Hodgetts, Head of Chambers

- i) Suspect emails/email attachments
- ii) Suspect web sites
- iii) Obscene/illegal material found on a PC

- iv) Persistent use of the internet for personal reasons
- v) Persistent downloading of illegal/obscene/offensive material.

Internet Security

General Policy re Personal Use

The minimal personal use by pupils and staff of Chambers' facilities and of their own I.C.T. such as mobiles, iPads etc. is acceptable for accessing the internet provided:

- the use is minimal and mainly out of normal working hours i.e. during lunch breaks or outside core hours of work.
- the usage does not interfere with client or Chambers' commitments
- the usage complies with other related policies

Continued use of facilities for all staff is based on the understanding that this use is not abused or overused. Such abuse or overuse could be deemed an individual disciplinary matter.

User Privacy Relating to Internet Use

On occasions it is necessary for Chambers to monitor correspondence and communications to ensure the effective operation of I.C.T. systems and to ensure that professional standards are maintained. There might therefore be occasions when it is necessary to check internet communications to or from a member of (future) staff.

Chambers trusts (future) employees not to misuse these facilities. However, because (future) employees are allowed to use internet for personal reasons, it may be impractical to conduct monitoring as described above, which does not in some way impinge on the privacy of employees. Chambers for its part undertakes not to intrude to an unnecessary extent into private internet use or to use/repeat/circulate any information which may come to its knowledge by way of the monitoring. However it is generally not advisable to access sites at work which you would not want a third party to be aware of.

Disposal of data

Personal data and confidential material must be disposed of securely.

Hard copy papers containing personal data and confidential material must be securely shredded in accordance with Chambers Privacy Policy

Computers and electronic storage media must be securely disposed of in accordance with Chambers' procedures and privacy policy.

Website Management

Management of the content of the Chambers website www.glenhodgetts.com is the responsibility of Glen Hodgetts. Changes to the website can only take place on his authorisation. This includes:

- ensuring content is up to date;
- approving new or revised documents for publication
- ensuring content does not infringe copyright;
- specifying conditions for downloading material;
- ensuring compliance with the Equality & Diversity Act 2010 and in doing so considering the accessibility of the site for those who are less able;
- ensuring the provision of a privacy notice explaining how any data collected from visitors will be managed.

The website will specify that, in the event of any dispute arising as a result of content posted on the website, the jurisdiction and applicable law to be invoked is that of England and Wales.

The decision to link the website with that of any other organisation and the management of the arrangements will be the responsibility of Glen Hodgetts.

Social Media

Introduction

The growth of the use of social media by clients is resulting in a corresponding expectation that the legal profession should also embrace it as part of its working practices. Social media activity is beneficial for engaging with clients and other professionals and can be used to allow greater access to legal information and resources. It also provides greater opportunities for professional networking and it can be used to debate, share opinions and share experiences by 'posting' or commenting in public spaces.

However as well as understanding the benefits of using social media, it is important that there is an awareness of the potential risks involved, in particular the potential blurring of the boundaries between personal and professional use. It is important to recognise that the same ethical obligations apply to professional conduct in an online environment as apply in all other environments.

General Policy re Personal Use

The minimal personal use for social media purposes by pupils and (future staff/barrister) of the Chambers' facilities and of their own I.C.T. such as mobiles, iPads etc. is acceptable provided:

- the use is minimal and mainly out of normal working hours, for example, during lunch breaks or outside core hours of work.
- the usage does not interfere with client or Chambers' commitments
- the usage complies with other related policies,

Continued use of our facilities for all pupils and (future staff/barristers) is based on the understanding that this is not abused or overused. Such abuse or overuse could be deemed an individual disciplinary matter.

Types of Social Media

There are many different types of social media channels, which attract specific audiences for different purposes. These include:

- forums and comment spaces on information-based websites, for example BBC Have Your Say
- social networking websites such as Facebook, LinkedIn etc.
- video and photo sharing websites such as Flickr and YouTube

- weblogs, including corporate and personal blogs
- micro-blogging sites such as Twitter
- forums and discussion boards such as Yahoo! Groups or Google Groups
- online wikis that allow collaborative information sharing such as Wikipedia
- any other websites that allow individual users or companies to use simple publishing tools.

Under no circumstances should personal data of clients be communicated via any social media with the explicit consent of the individual client in question in writing and only to the extent that this is lawful, for example, when blogging about the result of a particularly important judgment which is now in the public domain.

Application of the Social Media Policy

These rules apply to the use of social media whether:

- during office hours or otherwise
- they are accessed using the Chambers' I.C.T. facilities and equipment
- they are accessed using equipment belonging to Chambers' staff

It applies to all individuals at all levels and grades including consultants, casual and agency workers, work experience or volunteers, regardless of working arrangements.

Chambers does not use Social Media for professional purposes save for communicating legal results via Twitter and for generally engaging in blogging about legal subjects. Twitter is also used, as is the chambers website, for marketing, raising awareness of our Chambers' services and supporting our objectives. Any expansion of chambers use of social media for professional purposes will be discussed and agreed with Glen Hodgetts. Glen Hodgetts is responsible for all communication via social media.

Social Media and our Chambers

Although Chambers does not actively participate in social media save for the above, it is recognised that members of (future) staff may do so in a personal capacity. While we would not wish to restrict personal use of social media, in using it all personnel must:

Never use social or any other media to make any defamatory or damaging comments about Chambers, barristers, colleagues within the workplace, or those associated with Chambers, including clients.

Understand that comments or behaviour made via social media about Chambers, work colleagues, clients, those associated with Chambers or anyone else, which can be associated with Chambers, and which are offensive, discriminatory, or defamatory or that may result in reputational damage for Chambers may give rise to disciplinary action, even if the comments or behaviour are not made using Chambers' equipment or during working hours.

Understand that if the Chambers' name is linked to the comments/behaviour, if the nature of the contents of the comment or nature of the conduct may appear to relate to the Chambers or its staff or barristers, or if the comments are about or target someone associated with Chambers, then such conduct may well be sufficient for the matter to be viewed as work related and so a disciplinary matter.

Never use social media in a way which is a breach of any of the Chambers' internal policies.

Never register Chambers' email addresses on social media sites.

Never disclose any Chambers' trade secrets or confidential information relating to barristers, Chambers, and/ or its employees on social media sites.

Never disclose any work related issue or material that could identify an individual who is a barrister, a client or work colleague, which could adversely affect Chambers, a client or our relationship with any client.

Never suggest that any views expressed on social media are the views or opinions of Chambers or its barristers.

Breaches of this policy

A breach this policy may result in disciplinary action under our Disciplinary Procedures. A member of (future) staff may be required to remove postings which are deemed to be a breach of this policy and failure to comply with such requests may in itself be deemed a disciplinary issue.

General Rules

Posting to any social media should never occur without proper authority.

Any uncertainty or concern about the appropriateness of any posting must be discussed with the person in charge of social media.

Client confidentiality must be maintained at all times.

The confidentiality of our own strategic and commercial information must be maintained at all times.

The use of Chambers' logos, brand names, trademarks or colour schemes must be in line with our protocols.

Never register Chambers email addresses on social media sites unless such sites are being used for a Chambers activity and you have approval to register a Chambers' email address on such a site.

Any employees making use of social media for approved use should ensure they do not infringe any copyright or intellectual property rights of others. Where appropriate, sources of information posted must be accurately cited.

Social media communications that might be misconstrued in a way which is directly or indirectly detrimental to Chambers' reputation must be avoided.

Social or any other media must never be used to make any defamatory or damaging comments about Chambers, barristers, colleagues within the workplace, or those associated with Chambers, including clients.

Where social media sites are used for commercial purposes then any contacts made are regarded as Chambers' property and as such, individuals will be required to delete the details from personal social media accounts upon termination of employment.

If Chambers uses social media for the purpose of due diligence in recruitment, it will do so in accordance with data protection and equality and diversity obligations.

Data Subjects' Rights and GDPR

Data Controllers now have more obligations to facilitate data subjects' rights under GDPR.

These rights include:

- Right of information and access
- Right to rectification
- Right to erasure
- Right to restriction
- Right to portability
- Right to object

Right of Information and Access

Data subjects have the right to obtain from the Data Controller - confirmation as to whether or not his/her personal data is being processed; where it is; access to the personal data and the following information:

- The purposes of processing;
- The categories of personal data concerned;
- The recipients, or categories of recipients, to whom the personal data have been, or will be disclosed, including recipients in third countries or international organisations;
- Where possible, the length of time that the personal data will be stored for, or the criteria used to determine that period;
- The existence of the right to request from the Data Controller rectification or erasure of personal data or restriction of processing or to object to such processing;
- The right to lodge a complaint with the supervisory authority;
- Where personal data is not collected from the data subject, information as to the source;
- The existence of automated decision-making, including profiling, the logic involved in such decision-making and any consequences for the data subject; and
- Where personal data is transferred to a third country or international organisation, details of any safeguards in place.

The data controller must provide a copy of the personal data being processed free of charge – reasonable charges can be made for any further copies requested.

Right to Rectification

Data subjects have the right to obtain, without undue delay, the rectification of inaccurate personal data concerning them from the Data Controller.

Subject to the purposes for processing, data subjects have the right to have incomplete data completed, including by means of providing a supplementary statement.

Right to Erasure ('Right to be forgotten')

Data subjects have the right to obtain from a data controller the erasure of personal data concerning them, without undue delay and the controller is obliged to erase that data where one of the following grounds applies:

- The personal data is no longer necessary in relation to the purposes for which it was collected or processed;
- The data subject withdraws the consent on which the processing is based and there is no other legal ground for processing;
- The data subject objects to the processing and there are no overriding legitimate grounds for processing;
- The personal data has been unlawfully processed;
- The personal data has to be erased for compliance with a legal obligation; or
- The personal data has been collected in relation to the offering of information society services under Article 8.1.

Where the Data Controller has made the personal data public and is obliged to erase the personal data, the data controller; taking account of available technology and the cost of implementation, must take reasonable steps to inform data controllers processing the personal data that the data subject has requested erasure. Personal data does not require to be erased where processing is necessary:

- For exercising the right of freedom of expression and information;
- For compliance with a legal obligation;
- For reasons of public interest in the area of public health Article 9.2 (h) and (i) and Article 9.3;
- For archiving purposes in the public interest, scientific or historical research purposes or statistical purposes, in accordance with Article 89.1; or
- For the establishment, exercise of defence of legal claims.

Right to Restriction of Processing

Data subjects have the right to restrict a Data Controller's processing of their personal data where:

- The accuracy of the personal data is contested by the data subject. Processing can be restricted until the Data Controller has verified the accuracy of the personal data;
- The processing is unlawful but the data subject opposes erasure and requests restriction instead;
- The Data Controller no longer needs to process the personal data but the data is required by the data subject for the establishment, exercise or defence of legal claims; or
- The data subject has objected to processing pursuant to Article 21.1, pending verification whether the legitimate grounds of the controller override those of the data subject.

Right to Portability

Data subjects have the right to receive their personal data (where they have provided it to the Data Controller), in a structured, commonly used and machine-readable format and to have the data transmitted to another data controller without hindrance, where:

- Processing is based on consent; and
- Processing is carried out by automated means.

This right is dependent on the transfer between the Data Controller and the data subject being technically feasible.

The right will not apply to processing necessary for the performance of a task carried out in the public interest, or in the exercise of official authority vested in the controller.

This right cannot be exercised if it will adversely affect the rights and freedoms of others.

Right to Object

Data subjects have the right to object (on grounds relating to their situation) at any time to processing of their personal data which is based on:

- Necessity for the performance of a task carried out in the public interest, or in exercise of official authority vested in the Data Controller Article 6.1.e; or
- Necessity for the purposes of legitimate interests pursued by the data controller or other third party, except where this overrides the interests and fundamental freedoms of the data subject Article 6.1.f.

The Data Controller will have to stop processing the personal data unless it can demonstrate compelling legitimate grounds for the processing which override the interests, rights and freedoms of the data subject or for the establishment, exercise or defence of legal claims.

If personal data is processed for direct marketing purposes, data subjects can object at any time to such processing, including profiling that is related to direct marketing. Where the data subject does object, the personal data can no longer be processed for these purposes.

The right to object must be brought to the data subject's attention at the first time of communication with the data subject and should be presented clearly and separately from any other information.

Automated Processing and Profiling

Data subjects have the right to not be subjected to a decision based solely on automated processing, including profiling, which produces legal effects concerning them, or significantly affects them. This right will not apply if the decision:

- Is necessary for entering into, or performance of, a contract between the data subject and the Data Controller;
- Is authorised by Union or Member State law; or
- Is based on the data subject's explicit consent.
- The Data Controller must implement suitable measures to safeguard the data subject's rights, freedoms and legitimate interests, or at least the right to obtain human intervention and contest the decision.
- Decisions referred to in paragraph 2, must not be based on special categories of data (unless the exceptions in Article 9.2 apply).

Disciplinary Action

This Policy makes up part of the any future contract of employment if the Chambers of Glen Hodgetts employs staff in the future and shall be applicable to all Chamber's employees.

Failure to follow the rules and guidelines as outlined in any part of this Policy may be a disciplinary matter and if appropriate will be dealt with under the Chambers Disciplinary Procedure.

Any breach of this Policy by a barrister may result in action being taken under the Chambers Constitution/Disciplinary procedures/other description.

PART THREE

Part Three of this Policy Document applies to Glen Hodgetts and any barrister who becomes a member of chambers, including pupils when acting as data controllers. Although Glen Hodgetts is currently a sole practitioner at the time of writing this policy, this policy will apply immediately in like fashion to all barristers who join chambers as a member.

Introduction

1. rC15.5 of the BSB Handbook states:

“... you must protect the confidentiality of each client’s affairs, except for such disclosures as are required or permitted by law or to which your client gives informed consent”.

2. It is your individual responsibility as a barrister to preserve the confidentiality of your client’s affairs.
3. In the absence of specific instructions from instructing solicitors, these guidelines are intended to apply to all material received or brought into being by barristers in connection with their professional work and which contain confidential material and/or personal data to which the Data Protection legislation applies. Such information is referred to in these guidelines as "Confidential Material".
4. The use of the term “should” in these guidelines refers to good practice, of application in most situations and where any deviation will require justification according to the specific circumstances; a general practice which deviates is unlikely to be acceptable. The use of the term “must“ means that compliance is required to meet obligations under the BSB Handbook.

The receipt and handling of physical material

5. Confidential Material should not be left in a position where it might be read inadvertently by another person entering the room.
6. Confidential Material should not be read or worked on in public where it can be overlooked by members of the public.
7. Confidential Material should be stored in chambers or any other secure place to which the barrister instructed has regular access such as his home. If Confidential Material is taken

out of your home or chambers, you should try to restrict the amount taken out to what is necessary.

8. Confidential Material should be moved securely. On public transport Confidential Material should not be left unattended. If travelling by private car, where practicable, keep Confidential Material out of sight and store it as inconspicuously as possible. Confidential Material should not be left in a car unattended except where the risk of doing so is less than the risk of taking it with you. It should not be left in an unattended car overnight.

Physical security of electronic devices

9. You should also take appropriate steps to ensure the physical security of desktop computers, laptops, tablets, smartphones, PDAs, and USB sticks and other removable storage devices that contain Confidential Material.
10. In particular you should not:
 - 10.1 leave devices in an unattended car overnight, and;
 - 10.2 leave devices unattended in a public place (although there is no objection to leaving them in a locked court-room during adjournments).
11. Where possible, computers, tablets and smartphones used for professional purposes should not be placed so that their screens can be overlooked, especially in public places.

Laptops and other portable devices

12. Particular risks to client confidentiality arise from the loss of Confidential Material held on laptop computers, tablets, smartphones, PDAs, USB sticks and other removable storage devices. A single portable device may contain years of work that will contain very large amounts of Confidential Material. The loss of information that you are used to handling on a routine basis (such as previous convictions, commercial contracts, and medical reports) may cause considerable embarrassment to third parties as well as being a breach of the BSB Handbook and the Data Protection legislation. You should take as much care with this material as you would with your own valuables to prevent theft or loss.

13. You should consider restricting the amount of Confidential Material stored on portable devices to the minimum.

Electronic security and encryption

14. You should use appropriate security technologies suitable for the particular device or application (for example this may include anti-virus, anti-spyware and firewall software). You should be aware that malware can sit below the level of the operating system and may not be detectable by widely available anti-virus software. You should seek advice on additional protection to guard against this. Regular scans should be carried out, and the software must be kept up to date. If you are unfamiliar with the operation of such software you should seek advice as to how to set up such scans and the updating options of software. The latest updates to the operating system software should be installed.
15. Take care to avoid infection which may result from downloading malware, for example, by clicking on links in emails or downloading attachments or programs from sources that you do not know and trust. You should be especially vigilant concerning the risk of downloading malware by visiting websites which you do not have grounds for trusting, or by clicking on links in emails or opening attachments to emails. "Phishing" emails can be fabricated to appear to have been sent by a colleague or acquaintance, so be wary of any link or attachment in an email which you were not expecting, even an email from an apparently known and trusted sender.
16. Access to computers, tablets, smartphones and other electronic devices containing Confidential Material should be protected by password:
 - 16.1 You should take care to select a secure password. Passwords used to access computers or encrypted data should be sufficiently memorable that you can avoid writing them down, but not obvious or easily guessed. Long passwords are best, as a short password can be cracked more easily by hacking software. A combination of three words, using a mixture of upper case and lower case characters and at least one numeral may be easiest to remember. Default passwords (e.g. '1234', 'admin') should always be changed. It is sensible not to use the same password for all devices, services and websites and to change your password from time to time and in any event if it is

disclosed to another person or discovered. You should be aware that some websites store passwords in readable text.

16.2 Access using biometric technologies such as a fingerprint scanner or facial recognition software are acceptable alternatives.

17. Information stored electronically should be regularly backed up, and back-up media used for Confidential Material should be locked away, if possible. Ransomware is capable of attacking back-ups stored on a back-up drive, so back-up drives should only be kept connected when backing up data. Ransomware is also capable of attacking synchronised folders, so back-up data stored in the cloud should also be recoverable from prior versions which are not stored in a synchronised folder (known as point in time recovery).
18. Computers, tablets, smartphones and other electronic devices used at home to access Confidential Material should be protected from unauthorized and unrestricted access by third parties.
19. The Information Commissioner's Office recommends that portable and mobile devices including magnetic media, used to store and transmit personal information, the loss of which could cause damage or distress to individuals, should be protected using approved encryption software which is designed to guard against the compromise of information. Wherever practicable therefore, Confidential Material stored on laptop computers and other portable devices (such as memory sticks, CD-ROMs, removable hard disk drives, tablets, smartphones and PDAs) should be encrypted in a reasonably secure manner, or as specified by the professional client. The Chambers of Glen Hodgetts does this by use of the secure data portal and multi-factor authentication on all mobile devices using Secure Portal by Stay Private Ltd and <https://equalityhlaw.secure-comm.com> - all data is encrypted - SES 256.
20. Glen Hodgetts desktop computer is also encrypted by FileVault (whole disk encryption) and all client files are further encrypted in Chambers work folder - in short, requiring 3 passwords to access the data. Glen Hodgetts profile is also password protected and cannot be accessed by family or 3rd parties at his home. Further guidance on encryption may be available on the Information Commissioner's website. (Encryption is necessary even on a password-protected laptop, since the password protection can easily be bypassed by removing the hard disk drive and installing it in another computer or an external disk drive

holder. Password protection may also be bypassed in other ways.) The type of encryption that is appropriate will depend on the circumstances:

- 20.1 Whole disk encryption is more satisfactory than encryption of particular folders;
 - 20.2 A computer used by family members or others may in addition require encryption of specific folders, including the user profile folder, in order to prevent unauthorized access to Confidential Material by shared users or other third parties, and;
 - 20.3 Barristers using folder encryption alone should satisfy themselves that this will provide a reasonable level of security. Some programs create temporary data files from which Confidential Material could be retrieved following loss or theft of the computer. These data files, and files containing emails, may also need to be encrypted.
 - 20.4 Some device providers supply full device encryption which can be enabled by the user. Check with your supplier whether this applies to your device. Although this will improve security, this encryption facility may not meet the requirements of a specific client (such as the Government).
21. Glen Hodgetts computer is backed up on two separate Apple timemachines in encrypted form. The backups occur automatically every hour. The time machines are stored in different rooms and hidden. The network is password protected and wired.
 22. It is essential to make backups of data both before and after installing encryption, since in the event of virus infection or in the event of malfunction during or after installation of the encryption program the computer may become unusable. Some defragmentation programs are incompatible with encryption programs and may result in loss of encrypted data.
 23. Appropriate software should be used for encryption. The Bar Council does not endorse any individual software program or supplier. Not all encryption software meets the guidelines for barristers undertaking government work; those guidelines can be found [here](#).
 24. Any device, code or password for the emergency recovery of encrypted material should be stored in a reasonably secure manner.
 25. Where a client expressly requires that removable devices or media provided by them are used, such device or media should be used in preference to your own, unless it is apparent

that it is less secure. If it is apparent that the device or media is less secure, you should discuss this with your client, including, where necessary, your lay client.

EMAIL

26. Glen Hodgetts operates a secure encrypted email portal based in the EU which is 'GDPR compliant', through which all or all sensitive information can be transferred to and from Glen Hodgetts. Please email Glen Hodgetts at glen.hodgetts@equalitylaw.co.uk or securely at [glen.hodgetts@equalitylaw.secure-comm.com](https://equalitylaw.secure-comm.com) in order to set up your secure and individual communication stream. You will be given a direct link to your personal stream and will be able to access it after creating your own confidential 4 digit pin. The portal will send you a user name and password. Once set up, secure communication can be made by clicking on the "reply securely" button in my email to you, or via my online secure portal at:-

<https://equalitylaw.secure-comm.com>

Please email me normally at glen.hodgetts@equalitylaw.co.uk if you have a problem setting up your secure communication individual stream via my portal.

Glen Hodgetts' secure portal operates with click-and-PIN access, TLS connections, AES-256 encryption and multi-factor authentication for your data's protection. If you do not wish to use this secure form of email then you must consent not to do so in writing; please let Glen Hodgetts know if writing that you do not wish to use his secure portal.

27. E-mail is a potentially insecure method of communication. Appropriate steps, such as encryption during transmission, should be taken if it is considered necessary to send particularly sensitive information by e-mail and if required by your client. In such cases you should agree with your client what encryption to use.
28. You should never send the password required to decrypt an attachment in the same e-mail as the attachment since this would self-evidently defeat the purpose of encryption to avoid interception. Always use chambers secure portal's multifactor authentication system.

29. If you arrange for e-mails to be sent to your mobile telephone, smartphone or PDA, you should ensure that the device is suitably password-protected and, if appropriate, encrypted. Always use chambers secure portal using the Secure Portal App by Stay Private Ltd.
30. You should take care when using the 'auto complete' function that is offered by some email systems to ensure that you do not accidentally select the incorrect email address. This can be avoided by using chambers individual client streams via the secure portal: <https://equalitylaw.secure-comm.com>
31. Caution is advised when using the carbon copy (cc) function and blind carbon copy (bcc) function to ensure that you are not sending data to the incorrect recipient.
32. Lists of previously used telephone numbers, fax numbers and email addresses should be kept up to date.
33. The Data Protection legislation contains restrictions on the transfer of personal data to countries outside the European Economic Area which do not provide an adequate level of security. For this reason reputable email service providers who are based in and provide email storage facilities in the European Economic Area should generally be used. If you use an email service provider based elsewhere you should check that emails will be stored in a country where the law provides sufficient safeguards in relation to data protection and that terms and conditions provide sufficient assurances in relation to data security. In the case of service providers in the USA there is a known risk that emails could be accessed by governmental authorities or following a court order. Moreover, a non-US subsidiary of a US company may be required to disclose information which is stored outside the USA to US governmental authorities. You should therefore consider whether the information contained in your communications is of a nature which needs to be kept secure from US governmental authorities, so that US-owned email service providers should not be used. The Chambers of Glen Hodgetts Secure Portal of <https://equalitylaw.secure-comm.com> is based in the UK and thus in the EU. Accordingly, this is the most secure and safe cloud to use and is encrypted.
34. Although there is presently in force an EU US Privacy Shield Agreement, that Agreement is currently under challenge before the ECJ and is in the process of being reviewed. You

should therefore consider carefully whether to store data in the US in reliance on the Privacy Shield. Chambers current policy is not to use storage stored in the US for any sensitive or client data.

35. Connecting to the internet via a wireless network presents a particular risk of interception of communication. You should take particular care when connecting via public and unencrypted access points. You should in any event refrain from making your computer detectable by others on the network. If you use a wireless network system in your home you should ensure that it is reasonably secure - the wireless network used in the Home of Glen Hodgetts is encrypted and password protected.

CJSM Secure Email

36. Practitioners who use CJSM secure email, in particular, criminal defence practitioners, may find it useful to refer to the 'Frequently Asked Questions' document, which can be found [here](#).

Cloud Computing

37. Barristers contemplating using cloud computing services, in particular services targeted at consumers generally, should assure themselves that the service provides sufficient safeguards in relation to confidentiality, security, reliability, availability and data deletion procedures. You may wish to refer to the [Bar Council's guidance on cloud computing](#), the [ICO's guidelines on cloud computing](#), and the [Law Society's guidance](#) which may also be helpful. The secure portal of the Chambers of Glen Hodgetts is GDPR compliant and should be used whenever possible.
38. The Data Protection legislation contains restrictions on the transfer of personal data to countries outside the European Economic Area, which do not provide an adequate level of security. For this reason reputable service providers who provide storage facilities for data in the European Economic Area should generally be used - Glen Hodgetts secure portal is provided by Stay Private Ltd and based in the UK. If you use a service provider based elsewhere you should check that data will only be stored in a country where the law

provides sufficient safeguards in relation to data protection and that terms and conditions provide sufficient assurances in relation to data security. You should also be aware that storage facilities located outside the USA but owned by a subsidiary of a US company may be subject to US governmental surveillance. You should also be aware of the risks arising from reliance on the EU US Privacy Shield.

39. Some cloud storage facilities state that they provide encryption, but this does not mean that files stored in the cloud are accessible only to the cloud storage service provider's customer. Some cloud storage service providers are able to gain access to the contents of encrypted files in order that they can provide access in accordance with a court order or a governmental request. Barristers using cloud storage facilities to store sensitive data should consider encrypting files themselves before uploading to the cloud, or using a cloud service provider whose software encrypts files before uploading.

Fax security

40. If you use fax, you should be aware of the Information Commissioner's guidelines, which are as follows:

40.1 See Part 2 above which is applicable. Consider whether sending the information by a means other than fax is more appropriate, such as using a courier service or secure email. Make sure you only send the information that is required. For example, if a solicitor asks you to forward a statement, send only the statement specifically asked for, not all statements available on the file.

40.2 Make sure you double check the fax number you are using. It is best to dial from a directory of previously verified numbers.

40.3 Check that you are sending a fax to a recipient with adequate security measures in place. For example, your fax should not be left uncollected in an open plan office.

40.4 If the fax is sensitive, ask the recipient to confirm that someone is at the fax machine and ready to receive the document, and that there is sufficient paper in the machine.

40.5 Ring up or email to make sure the whole document has been received safely.

40.6 Use a cover sheet. This will let anyone know who the information is for and whether it is confidential or sensitive, without them having to look at the contents.

Chambers matters

41. Reasonable steps should be taken to ensure the reliability of IT and other staff who have access to IT systems. This would be likely to include checking identity and references. Encryption of particularly sensitive documents may be necessary to prevent technical staff accessing them.
42. Barristers, pupils and staff in Chambers should be given training on the importance of information security, and this training should be repeated every 24 months. The ICO have training materials available on their [website](#). Glen Hodgetts has viewed these training materials.
43. Chambers should have procedures in place for reporting any loss of electronic media or papers upon which or in which Confidential Material might be stored. When a loss or theft occurs, Chambers, the professional client and (if appropriate) the police should be immediately informed. Please see Chambers policy on reporting of data breaches.
44. A log should be kept of devices upon which Confidential Material might be stored, including serial numbers, where available, and a record of encryption software installed. This will assist in the recovery of any lost or stolen items.

Disposal

45. It is a requirement of the Data Protection legislation that personal data (as defined in the Data Protection legislation) should not be retained for longer than is required. However, this may be 7 years or longer for case files. Data retention, review and deletion schedules should be set up both as part of Chambers' systems and in respect of barristers' own I.C.T. systems. These schedules should be implemented as an automatic review process by Chambers, in its capacity as a data processor in respect of data for which barristers are data controllers, as directed by barristers. Individual barristers will need to implement the schedules on their own I.C.T. systems. While some Chambers may collectively agree the

same schedules, individual barristers may decide to vary these schedules to meet the requirements of their own practice. The retention of precedents, pleadings, advices and documents that have been used in open court, from which personal data have been removed by anonymising, is not a breach of the requirements of the Data Protection legislation.

46. Chambers should have procedures in place for the secure disposal of Confidential Material and electronic media (e.g. the cross-cut shredding of papers and CD-ROMs), and hard drives.
47. Barristers who wish to dispose of any computer or electronic media upon which Confidential Material has been stored must ensure the material is effectively destroyed or wiped using a recognized method to put the data beyond recovery. Merely deleting the files, single-pass overwriting, or reformatting the disk is insufficient. Physical destruction or the use of specialist deletion and overwriting software is necessary. Further guidance on the secure disposal of hard drives is available [here](#).
48. Barristers whose practice includes work for Government departments or agencies will need to comply with the [Attorney General's Guidelines on Information Security and Government Work](#).
49. The Information Commissioner's website provides detailed guidance on information security. Very substantial monetary penalties may be imposed in the event of serious contravention of the Data Protection legislation. Such contraventions may include loss of laptops, portable devices or portable storage media, where the data remains accessible to third parties. BMIF have advised that such penalties are not covered by their professional indemnity insurance. Factors affecting the size of the penalty include the seriousness of the breach and the conduct of the data controller following the breach, such as when and whether or not the breach is reported to the Information Commissioner's Office. In the event that a failure to keep information secure amounts to "serious misconduct", a barrister would be obliged to report him or herself or another barrister to the Bar Standards Board under rC65.7 or rC66 of the BSB Handbook. In the event of such a failure, a barrister is obliged to take all reasonable steps to mitigate the effects, according to the guidance (gC94) under rC65.

PART FOUR

47. Further Guidance

If you are unsure on any aspect of this policy and/or would like further guidance regarding:

- The Chambers approach to information management,
- The Chambers compliance with GDPR obligations,
- Information Security,
- Training,
- Anything else relating to this policy,

Then please contact Glen Hodgetts, Barrister at Law at

glen@ggsc.co.uk

48. This policy was first created on: 24th May 2018

and last updated on: 8th August 2024

Application of this Policy

Parts One and Two of this Policy Document apply to any members of staff, pupils doing work as pupils and mini-pupils. Except where they are specifically stated to apply to barristers in Chambers, they do not apply to barristers (other than pupils doing work as pupils). This is because some options may not be appropriate for barristers, who may, for example, need to access offensive or illegal material in the course of their practices or wish to use social media in relation to their practices. Barristers are however expected to be aware of Part Two and to take account of its contents in the use of their own and Chambers I.C.T. facilities and in relation to the management of information generally. Barristers are expected to put in place adequate information security measures to protect data, to protect the rights of data subjects, and to fulfil their regulatory obligations as data controllers. This may include adopting similar information management measures to those set out in Part Two.

Additional policies and procedures relating to information security are set out in Part Three of this Policy Document. Part Three applies to barristers, including pupils when acting as data controllers.

For barristers, in the event of inconsistency between Part Two and Part Three, Part Three shall prevail.

Part Four is of general application.
